

**Freezer While Splitting Single Master C-Line**  
 ECM/EMM Betatunnel (<http://www.streamboard.tv/oscam/changeset/10010>)

- |   |   |   |
|---|---|---|
| <p><b>Clients/Proxies</b></p> <ul style="list-style-type: none"> <li>- Connect several clients to a proxy server</li> <li>- Able to act as a sub proxy-server (until ecms timeout)</li> </ul> | <p><b>Clients/Proxy-Server</b></p> <ul style="list-style-type: none"> <li>- Splits a single c-line into several lines</li> <li>- Caches several good keywords (until ecms timeout)</li> </ul> | <p><b>Server</b></p> <ul style="list-style-type: none"> <li>- Shares a single c-line</li> </ul> |
|---|---|---|

- Depends on local and remote caches, card frequencies etc.
- Expand network with (sub)proxies until timeout
